### **A New High Tech Back-Office Platform for Olympia**

Olympia Capital Exchange announces the adoption and installation, system wide, of MarketFast Software Systems' latest Back Office Management Platform.

With capital markets becoming more multi-faceted and diversified and the number of new exchanges and contracts traded around the world rapidly rising, financial institutions need to be able to process any asset in any currency anywhere in the world, handle growing volumes and increasing costs, and adjust to new operational models.

MarketFast Software Systems, Inc. provides Olympia with a total platform suite of global post-trade solutions that helps financial services firms in the securities and derivatives markets efficiently manage their middle and back-office processes and workflow.

Mr. Robert Rustin, Olympia Capital Exchange Chief Investment and Clearing Manager said, "MarketFast's scalable solutions help automate interfacing with exchanges and clearing houses as well as matching, settling and booking trades, helping to improve straight-through processing (STP) across the enterprise. The new platform will help us increase transparency and reduce operational complexity, risk and cost from our operations center in Europe as well as our investment back-office center in Panama servicing all of our Asia Pacific and The America's operations."

MarketFast, a leading independent provider of Enterprise Data Management (EDM) solutions for the securities and investment industry, is managing the successful re-architecting of Olympia's core back office systems.

"The installation of Market's EDM will facilitate near-real time processing of Olympia's reference data and expects their installed platform to achieve overall productivity benefits of up to 70% over the previous system" commented, Mr. Carter Morris, Director of Sales for MarketFast.

He further noted, "The system enables Olympia to accurately model and link together Customer, Issuer, Instrument and Corporate Actions data while being able to scale in a structured manner."

Overall, the MarketFast Software System provides flexible business process management capabilities and custom business and workflow processes, which are driven by both regulatory and compliance responsibilities, as well as internal and market-related requirements.

Most important, Olympia will be able to enhance its ability in responsiveness to marketplace regulations, market rules related to issuers and their securities are embedded in the system, leading to reduced manual data input, higher data quality and increased straight-through processing (STP) rates. The move to a real-time processing environment gives the platform the ability to support real-time products, services and further productivity enhancements thru shortened processing times.

This solution suite helps financial services firms automate their middle and back-office operations for derivatives, increase efficiency and support straight-through processing (STP). Gaining control over data, managing credit, trade fails and intraday margin while supporting internal and regulatory reporting.

“Olympia Capital Exchange, in recognizing the vast nature of the market and the benefit of building an ecosystem of partnerships around geographies, niches and different asset classes, sees this new platform enhancing our ability to deliver more complexed structures of assets with transparency of engineered cash flows. Transparent provision of back office and ecosystem services for debt issuance, hybrid securities, crowd funding, peer-to-peer investing and the alternative asset marketplaces improves the effectiveness of Olympia’s securities professionals. The enhanced clearing and reporting infrastructure also allows our institutional clients to syndicate investments and tap into networks of investors around the world.” Confirmed Mr. Clive Martindale, CEO of Olympia Capital Exchange.
